6. Important Financial Notes

Revenue Recognition

Apple recognizes revenue when control of products or services transfers to the customer. For Products, control generally transfers upon shipment; for Services, revenue is recognized over time as services are delivered. Total net sales for FY2024 were $391,035 million, comprising Products ($294,866 million) and Services ($96,169 million). Total deferred revenue was $12.8 billion as of September 28, 2024.

Debt

Apple's debt consists of commercial paper and term debt (senior unsecured notes). As of September 28, 2024, total term debt principal was $97,341 million, with $10,912 million classified as current and $85,750 million as non-current. Commercial paper outstanding was $9,967 million, with a weighted-average interest rate of 5.00%. The fair value of Apple's Notes was approximately $88.4 billion as of FY2024 year-end.

Cash

Cash, cash equivalents, and marketable securities are managed together as part of Apple's liquidity strategy. As of September 28, 2024, Apple held $29,943 million in cash and cash equivalents, $35,228 million in current

marketable securities, and $91,479 million in non-current marketable securities, for total cash and investments of approximately $156.7 billion.

Inventory

Inventories are stated using the first-in, first-out (FIFO) method. Apple maintains relatively low inventory levels ($7,286 million as of FY2024) relative to revenue, reflecting its outsourced manufacturing and just-in-time supply chain model.

Capital Expenditure

Payments for acquisition of property, plant and equipment (capital expenditures) were $9,447 million in FY2024, compared to $10,959 million in FY2023. Depreciation and amortization expense for FY2024 was $11,445 million.
